He proved that the iron was stot what he ordered, being a ton and a half do heavy, on which account it would break down the walls of the building. The planniff, however, proved that the gron furnished only weighed about 1200 pounds, so the court rendered judgment in favor of the plaintiff.

HE ATE AND BAN AWAY.

HE ATE AND RAN AWAY.

Shortly after noon yesterday Front atroot, from Morrison to B, was the scene of great excitement. Such racing and classing and blowing of police whistles has not been heard since young Lochiuvar ran away with his sweetheart. Citizens flocked to the scene from all directions and folsed in the jursuit of a flect runner, who was seen making good time down the street. He turned up R and, at the corner of Second, was saptarned by a policeman who, forgetting to blow his whistle, had time to attend to busings. It appears that the fugitive's gating to blow his whistle, had time to attend to busings. It appears that the fightive's name is Jose Dévine and that a friend saided him into dinner at the Occidental restaurant. At the conclusion of the meal the friend paid two bits for his own disner, leaving Devine to do his same. He had no money and consequently became involved in a dispute with the proprietor. Pas Relliher. Some loud talk was induged in and Devine, thinking that Relliher was going for a stomach pump, ran off-down the street. The manner in which he was pursued, and the crowd that gathered, and the way they whooped up the chase, and the great amount of excitament displayed, makes Devine think that the people of Portland attach a great deal of import hance to two-bits' worth of grob. The charge beoked against him was using abusive language.

HALBER VE. HOLLADAY.

Suit was commerced in the United States Suit was commenced in the United States circuit court yesterday by William Halsey of Rochester, New York, formerly vice-president of the O. & C. B. R. against the Portland Street Railway Company. The complaint filed is a tormidable doenment of twenty-two pages. From a hasty glance through it one is forced to the conclusion that Mr. Halsey thinks he has been swindled by Joe Holladay. He alleges that for everal months Joseph Holladay accordited a salary of \$500 per month, but that by a resolution of the board of direction this salary was reduced to \$250, also that he collected ground rent for the stable of the company.

put the machine together. There are n it about 1150 pipes, ranging from the size of a pipe stem up to a case large enough for a may to crawl inte. To man pulate the vaires to these pipes two key boards and a pedal toard are necessary, beside a great humber of stops and levers of various kinds. To an outsider it would appear as if a man would need a dozen feet and two dozen hands to play this organ, beside a sliding seat run by an electrical apparatus. The large pipes which appear on the front of the organ instead of being glided as usual are pulated according to modern asthetic tasts. When the organ is compleed will pour ferib a flood of suclocy which will made the whole building vibrate.

tate market is formished the Sixno's Onecoexia's by J. Frod. Clark & On, real estate sgents

The market remains comparatively speaking quiet. The primary cause undoubtedly is the withdrawal of large sum; or menay to keep good margins on railroad stocks. The speculative fever in this direction is something now for Portland, which has litherto been chruse-brized by cantions, conservative prudence. It would appear at a time like the present, when the general prosperity of business is causing a demand for stores and residences entirely beyond the supply, and the rapid filling up of the country, pointing to and ensuring the vigorous growth of the city, that the conservative people of Portland would see an infinitely more certain profit in real-state than in stocks, since the former always has some stability, whilst the vatue of the latter is an unknown quantity manipulated by designing and too often americal place and the control of investors so far removed from house of coparations as we in Oregon. Immigrants, with money in hand, seeking homes, are daily arriving. Indicat one spoint to an extraordinary inflax in the conding spring. For the most yart present arrivals are in search of land to over and califact. The growth and development of the country means increased strill ute to the business of the city.

FROM THE COMMERCAL ADVICTION.

During the last hour the most nuturess excitement prevailed on the atook exchange, in consequence of transactions in Northern Pacific preferred. Those sends of shreas that last been soid coult for the delivered, and sha brokers were compolled to have them bough in at the beart. Naturally the highest sort of premium was demanded. The foce full upon the customers. Of course, if they can't stand it, the brokers will. The highest price for stock was Tig cash, against 51 regular, or a premium of 137 per cent. It was expected that then yeld the bonness could not bur the twisting, but up to the last moment no festure had been reported. To day capped the climax. "Great Scott! Did you say 'Baled Hap'?"

"Yes; odd nama, tan't it. You see Walt Whitman wrote a book which he cails Leeves of Grass. That's where the idea comes from. I cannot say that I like Whitman's book, though! Seems to me he would make a good Mormon elder—that is, if he's anything like the sun't he writes. The hame of my book will be something like that of Walt's, but I assure you the books thechselves will differ greatly. The Tribune will get one of the first issued, and then you can judge for yourself."

"How soon will 'Baled Hay' appear?"

"Early this winter. It will be made up of sketches mostly, as were the other two. I am compiling these how, from the files of the Boomerang and pither papers to which I have contributed. It will also cottain considerable new matter. I have laid out the front and side elevations of this great work, and excavated for the proface. It is to be illustrated by Opper. Pack's best cartoonist, so you can draw your own conclusions."

This is about all the information elicited during the interviors; but a very enjoyable chat followed and the hour was late ere the seance was concluded and "good-bye" said.

The Leading Power of Europe.

The Leading Power of Burspe.

Thirteen years ago the French empire perished on the field of Sedan. Thirteen years ago the French republic was proclaimed in the streets of Paris. Momentous as was that great revolution in the destinies of French, it was less momentous than the revolution simultaneously accomplished in the destinies of Europe. France lost an emperor and gained at republic, but the headstry of Europe passed at the same moment to the German empire. In the republic of the continent each sovereign extra brooks no suzerain. Nominally all are equal. Service is as sovereign as Spain, Belgium or Russia. But in reality all the powers are well aware that the first place at the European council board belongs defeated to the strongest of their number. Since Sedan that position has belonged then; it has never been challenged since. For thirteen years Germany has held uncontested the headship of Eirope, and the latest anniversary of her crowning victory finds her authority more firmly established, more universally ing victory finds her authority more firmly catablished, more universally

a luncheoa Mr. Shirley Hibbard remarked that there was still a good dash of ignorance shown in putting pd tates on the table. It was the usual practice to bring them up in a porcelain dist, with a close fifting cover. In ten minutes the best potatoes, however earefully cooked, were thus utterly destroyed. He recommended that they should be placed in a wooden dist or served in a porcelain dist, with towels above and below to absorb the moisture.

FRENCH HOSTITALE.—A recent inquiry made by the bureau of public assistance shows that there are at the present time in France 1563 hospitals and asylums of all kinds, giving a proportion of one establishment for every 24,000 inhabitants. The officials and personnel of all these amount to 28,675 persons, viz. 2787 physicians and surgeons, 3050 dressers and hospital attendants, 11,283 on the religious staff, and 11,553 servants. The must is 164,550, of which 71,192 are at the service of the sick, 54,245 for incorrable and infirm patients, 16,050 for children, while 23,450 are reserved for those engaged on the surving staff. With regard to ordinary cases the number of cases allow the next on the hospital attendants in the 1666 establishment of a dmissions into the hospitals are 90 to every 10,000 inhabitants.
